

Ahmed Monir Almassri

Final-Year Computer Engineering Student | Aspiring M.Sc. Student in Data Science & Artificial Intelligence

Gaza, Palestine | +972 59 556 8204 | amassry.work@gmail.com | LinkedIn | GitHub

Academic Profile

Top-performing final-year Computer Engineering student at the Islamic University of Gaza with a cumulative GPA of **92.33/100**. Completed **145 credit hours** with **18 remaining**. Academic interests include Data Science, Artificial Intelligence, Retrieval-Augmented Generation (RAG), LLM-enabled systems, predictive analytics, computer vision, and scalable software engineering. Seeking advanced Master's studies to build socially impactful, data-driven AI systems.

Education

Islamic University of Gaza — B.Sc. in Computer Engineering **Aug 2022 – Present**

Cumulative GPA: 92.33/100 Final-Year Standing Completed Credit Hours: 145

Relevant coursework: Data Structures and Algorithms, Database Management Systems, Computer Security and Networks, Operating Systems, Embedded Systems, Computer Networks, and Digital Logic Design.

Selected Projects

AI-Driven Multi-Tenant School Management Platform **Graduation Project**

Smart AI School System | Next.js, TypeScript, Prisma, PostgreSQL, Gemini API, WebAuthn, Stripe

- Designed a multi-tenant educational platform with branch-level tenant isolation, unified academic data flows, and modular services for admissions, attendance, assessment, finance, parent engagement, and virtual classrooms.
- Built RAG and LLM-powered workflows using Gemini API for contextual assistance, AI-assisted grading, exam generation, and predictive analytics dashboards that support earlier academic and operational intervention.

Smart Aid Distribution Management System (SADMS v2.0) **Social Impact Project**

React, TypeScript, NestJS, PostgreSQL, IndexedDB, Web Crypto

- Engineered an offline-first humanitarian platform for beneficiary verification and aid distribution in low-connectivity environments, combining secure synchronization, cryptographic validation, and resilient field workflows.
- Applied data integrity, auditability, and operational coordination patterns to improve transparency and decision-making in socially critical logistics.

Human Tracking Pro **Computer Vision Project**

Python, FastAPI, YOLO11, ByteTrack, OpenCV

- Developed a real-time computer vision dashboard for human detection, identity tracking, pose-based action recognition, event logging, and analytics over live streams and uploaded video.

Open Source Contributor — Open Tarteel TV **GitHub Contribution**

TypeScript, Android TV, tvOS

- Contributed to an open-source TypeScript TV application by implementing a custom reciter adapter source, improving modularity and expanding support for diverse Quran audio providers in a shared upstream codebase.

Teaching, Leadership, and Service

Instructor, Computer Engineering Department — UCST **Sep 2025 – Present**

Lead Computer Logic Design II laboratory teaching for diploma students, strengthening hands-on learning, technical communication, and structured problem solving while sustaining instructional continuity under constrained conditions.

IEEE Student Branch — Islamic University of Gaza **Dec 2024 – Present**

Served as Vice Chair and later Chief Editor, coordinating teams, technical events, knowledge-sharing initiatives, and public-facing science communication for the student branch.

- Supported branch operations across multiple sections and contributed to student engagement, event organization, and IEEEExtreme participation support.
- Produced high-impact technical media and event documentation that strengthened branch visibility and communication.

Technical strengths: Python, TypeScript, SQL, JavaScript, Next.js, NestJS, FastAPI, Prisma ORM, PostgreSQL, Pandas, NumPy, RAG workflows, LLM application development, Gemini API integration, predictive analytics, YOLO pipelines, ByteTrack, OpenCV, Docker, Git, and cloud-oriented application design.

Cloud and data preparation: AWS Cloud Practitioner (CLF-C02), Associate Data Engineer in SQL, Database Design, Data Warehousing Concepts, Introduction to Snowflake SQL, Python for AI and Data Science, and Practical Automation with n8n.

Languages: Arabic (Native) English (Professional Working Proficiency)
