

Letter of Recommendation

To Whom It May Concern,

As the **Student Branch Mentor** of the IEEE Student Branch at the Islamic University of Gaza, it is a great pleasure to provide this academic recommendation for **Ahmed Monir Almassri (IEEE Member No. 101152528)**. Having closely supervised his contributions within the branch, I can confidently attest to his exceptional leadership, technical acumen, and remarkable perseverance in the face of adversity.

Institutional Leadership & Strategic Management

Ahmed served as the **Vice Chair** of the IEEE Student Branch from April 1, 2025, to December 1, 2025. In this capacity, he demonstrated a sophisticated understanding of organizational dynamics and strategic planning. He played a pivotal role in bridging the gap between the executive board and the student body, ensuring that our technical programs remained aligned with the global standards of IEEE. His ability to manage complex administrative tasks while maintaining a focus on the branch's educational mission distinguishes him as a leader with high potential.

Technical Proficiency & Creative Innovation

Since December 1, 2025, Ahmed has been serving as the **Head of the Montage and Media Department**, a position he holds to this day. In this role, he has been instrumental in digitizing our branch's outreach. His work involves more than just technical editing; it requires a deep analytical ability to translate complex engineering concepts into accessible, high-quality visual content. His proficiency in modern digital tools and his commitment to maintaining image and production integrity—even under technical constraints—showcases his dedication to professional excellence.

Academic Resilience in Extraordinary Circumstances

Perhaps the most compelling aspect of Ahmed's candidacy is his demonstrated **resilience**. Operating within the Gaza Strip presents unique logistical and psychological challenges that few students worldwide encounter. Ahmed has shown an extraordinary ability to lead and innovate despite severe resource limitations and unpredictable conditions. His capacity for "Problem Solving under Pressure" and his steadfast commitment to academic and extracurricular growth under these circumstances are clear indicators of his maturity and mental fortitude.

Final Evaluation

Ahmed Monir Almassri is not only a technically skilled individual but also a principled leader who thrives in collaborative and challenging environments. He possesses the intellectual curiosity and the disciplined work ethic necessary for success in any rigorous academic or professional program.

I recommend him with the highest level of confidence and am certain that he will be a valuable asset to your prestigious institution.

Sincerely,

Eng. Hamada Aburjela – Student Branch Mentor
